## Display Operation & Wiring

---

The display is Minutes-Seconds (MM:SS) timer that is controlled through dry contacts on two 2 conductor cables that are attached to the display. An on/off switch is used for run/hold. A momentary switch is used for rest to "00:00". All wiring is done by the end user.

<b><u>Wire (Color)</u></b>		<b><u>Wire (Color)</u></b>	<b><u>Display operation</u></b>
VEXT (Blue)	+	IN1 (Red)	Display begins Timing
VEXT (Blue)	+	IN2 (Red)	Display resets to 00:00

- The display will begin timing when a contact occurs between run and hold wires and holds (pauses) when there is no contact.
- The display will reset to 00:00 with a contact between reset wires.

The IR remote will turn on and off the display.
