

## Outdoor Message Signs In Red or Amber

PLC

ED3600 Gateway

### Description:

- EDV111 industrial message signs can be controlled using our ED3600 EIP / Profinet gateways. This device exchanges the Ethernet/IP protocol into ASCII serial strings compatible with the industrial message displays.
- The ED3600 allows for the message signs to be connected via an Ethernet CAT5 cable and not limited to a short distance RS-232 cable typically connected to traditional digital displays.

### Features:

1. Sample add-on instructions are provided to make ladder logic programming very easy. The sets of AOIs can be imported into your project and reused in ladder flow.
2. The ED3600 gateway is located inside the enclosure,
3. These message signs are enclosed in a NEMA4 aluminum cabinet or NEMA4X stainless-steel enclosures.
4. Outdoor monochrome displays are available using super-bright LEDs (red or amber).
