AVAILABLE

2.25" AND 4" BAR SEGMENT
Viewable up to 200 Feet Away

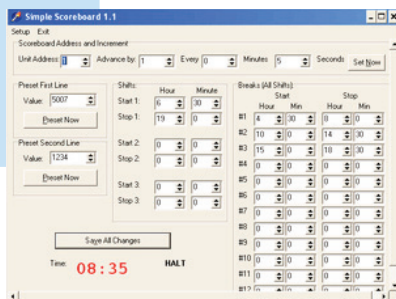

6", 8", 12", 18" DOT MATRIX

A multiple digit display that **increments by a user specified time and amount**. Free PC-based software or an optional remote keyboard (ED4150) can be used to present and run/hold the display.

Available with up to 16 Digits

Takt time indicates a pace or rate of manufacturing matched to customer demand. Takt time is used in lean manufacturing to align production time to demand where there are linked manufacturing processes. For example, advance by 3 every 10 seconds, advance by 1 every minute.

The display can also "freeze" (pause) and resume timing, reset to "0" by using the keypad (included) or through two customer-supplied cinctact closures. The increment value and the time interval are entered through the remote keypad (ED4150) or serially via a PC- based program (provided with the display).

PC Software Program
