Display Configuration

Preset Display

1. Press the **EDIT** button.
2. Change the value of the flashing digit using the number buttons on the remote. Use the left or right arrow button to move to another digit.
3. Press the **ENTER** button to save the value on the display.

Set Increment Interval and Value

1. Press the **DEL** button. The current Increment Interval (in seconds) will be displays in the left four digits. The current Increment Value will be in the right three digits.
 2. Press the **EDIT** button to edit the values displayed. Use the right and left arrows to navigate through the display's digits.
 3. Press the **ENTER** button to save the value on the display.
- **Note:** The display is limited to a 4 digit increment interval, meaning the largest increment interval that can be set is 9999 seconds or every 166.65 minutes

Set display to Time Up/Down

1. Press the **DEL** button to enter Setup Mode.
2. To set a Negative increment interval (**Time Down**):
 - Press and Hold the Down arrow in the TIMER1 section of the remote until a negative sign appears in the fourth digit.
3. To set a Positive increment value (**Time Up**):
 - Press and hold the Up arrow in the TIMER1 section of the remote until there is no negative sign in the fourth digit.
4. Press the **DEL** button to save and exit Setup Mode.

Display Brightness

Use the TIMER2 arrows to change the display brightness

- UP arrow increases brightness
- DOWN arrow decreases brightness

Notes on Display Operation

- Use the Start, Stop and Reset buttons to control the display (see the "Display Controls" section on the previous page).
- The display counts up until 99,999,999; it does not roll over to zero.
- The display counts down until 0; it does not display negative values.
- Leading zeros on the display can be removed by pressing the Zero button when not in Setup Mode.
